

HOW TO PLACE THE TV ON LMG

Follow the same steps for LMG HTZ TV

- Place the revolving panels

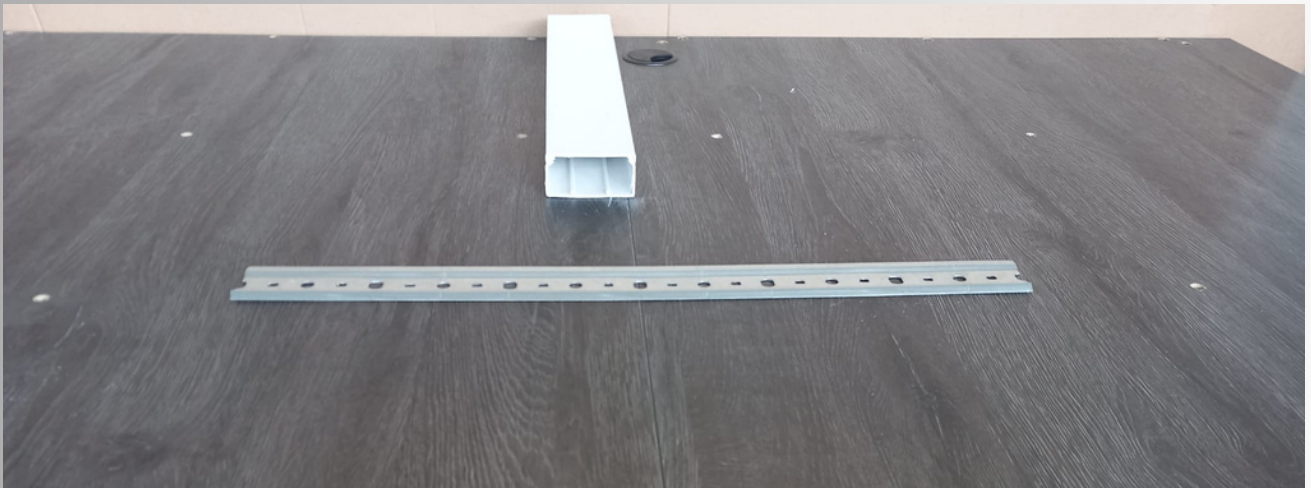

- Place the cable tray. You can adapt the cable tray if it's too long.

- Fix the cable tray to the revolving panels

- Place the metal support for the TV and fix it to the revolving panels.
- You can fix the metal support where you prefer according also to the size of the TV

- Place the metal support on the TV and screw it.
- We suggest buying the screws in a local hardware store (screws vary according to the type of TV). The screws supplied may or may not work for your exact TV model, so please check and then buy your own if this is not suitable after inspecting.

- If the TV is not flat, you can put some thickness - like washers as per the picture below

- Place the TV on the revolving panels

- Insert the cables into the cables tray
