

1

to move the product, please retract it and use both hands to lift it.

2

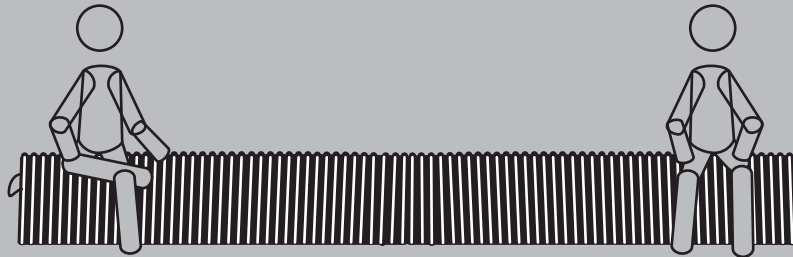

make sure the product stands stable on an even floor and not in a wobbling position

3

two people each hold one end and pulls the chair out to the maximum length

4

each person sits at each end for 3-5 minutes

repeat the above action 5-6 times to make the chair get used to the extension, in subsequent uses the product then could be manipulated to your preferred length and shape

to make the product return to a smaller size, then simply overturn the chair as it appeared in the box, and weigh down the seat of the chair with a heavy object.

this will ensure that the chair takes on a smaller shape, yet over time it is difficult to completely recover to its initial size

- keep away from moisture
- be careful of edges to avoid papercuts
- avoid placing near heat sources
- do not stand on the seat
- be careful of sitting on edges
